

EPITOME[™]
MUSIC

META DATA
ENCODING

*

Epitome Music provides an easy solution to embed relevant meta data into your audio files. These files are then searchable by your clients. Some data fields include Track Title, Version, Description, Similar Artists, CD Title, CD Description, Composer, Publisher, Lyrics, and other pertinent data.

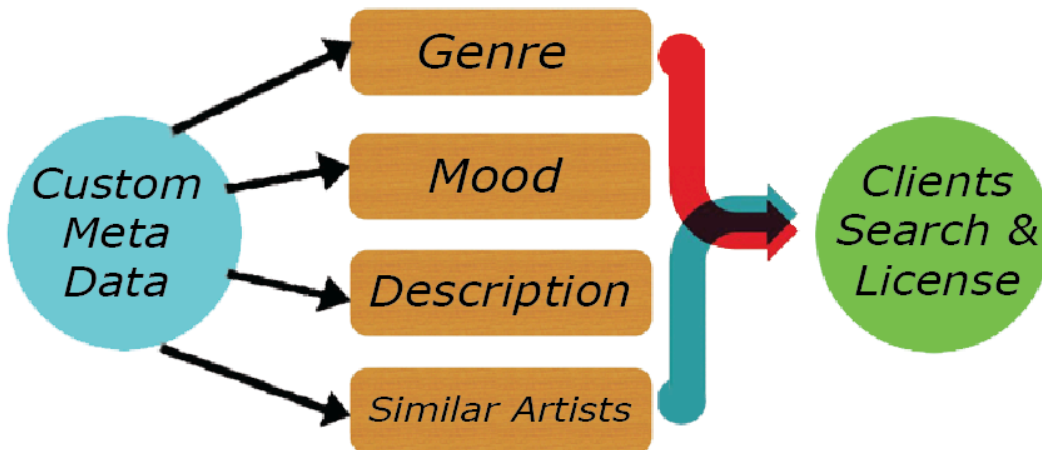

Only have your meta data saved in a database ? Epitome Music can easily extract and embed existing meta data into AIFs and / or mp3s.

Benefits:

- Clients can easily search your catalogue in iTunes, Soundminer, and top editing software, including AVID, FCP Pro, and many more.
- Epitome Music will embed over 15 fields of data!
- Lifelong investment. The tracks will always be tagged and searchable throughout the life of the file.

Costs:

Epitome will quote you on your exact needs. So depending on the size of your catalogue and how much meta data you want, you will receive a custom quote.

File Options:

- AVID
- AIFs (16 bit 48 KHz)
- 2 choices of MP3 files:
(128, 192, 256 or 320 kbps – all 48 KHz)
