Composer Codes

STREAMLINE YOUR WORKFLOW:

Epitome Music is pleased to announce the inclusion of Composer Codes into every track in our music library.

With this system, you can now easily find all of the PRO information you need and quickly include that into your Cue Sheets.

Utilizing this Coding System in conjunction with our Excel database (included with every hard drive we send out), you will immediately reduce the time and errors usually associated with filling out Cue Sheets. Our team preps all the files for you so you can focus on creative excellence.

Track Title example below:
